

## FAX Is Watching Out For You!

**F**AX has invested in a new video surveillance system for its fleet. FAX buses now are equipped with eight digital security cameras that capture images from the interior and exterior of the bus.

**N**ew Safety Vision surveillance units allow FAX to:

- ◆ Promote a safe and secure transportation environment
- ◆ Capture accurate footage utilizing remote wireless downloads
- ◆ Accelerate incident investigations
- ◆ Allow FAX Supervisors and Police Officers to access live video of activity inside and outside of the buses
- ◆ Deter vandalism and other criminal behavior

**F**resno Area Express would like to thank the Department of Homeland Security and the California Emergency Management Agency for the funding.
